DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 11-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Sano et al. (US 5694188A).

With respect to claims 11-13 and 15, Sano et al. discloses a liquid crystal electro-optical device comprising:

- a pair of substrates 1/17, at least one of said pair of substrates being transparent;
- a light modulating layer interposed between the pair of substrates, said light modulating layer including a liquid crystal, an optically active

substance [cholesteric (col. 1 lines 40-41) or isotropic fluid (col. 11 lines 66-67)], and a dichroic dye; and

- comb-shaped wall electrode 10 for applying an electric field in a direction parallel with the pair of substrates.

Wherein

- the liquid crystal and the dichroic dye are inherently aligned in the direction parallel with the substrate by the electric field to obtain a light transmission state.

Claims 14 and 16:

- No electric field is applied to attain a dark state (color state on screen) [when applied electric field to attain bright state] (col. 4 lines 48-56, col. 4 line 64 to col. 5 line 4).

Response to Arguments

Applicant's arguments filed on 10/25/04 have been fully considered but they are not persuasive.

Applicant's ONLY argument:

Sano does not describe or suggest the use of a layer that includes a liquid crystal, an optically active substance, and a dichroic dye.

Examiner's response to Applicants' ONLY argument:

Sano discloses the use of a layer that includes a liquid crystal, an optically active substance [cholesteric (col. 1 lines 40-41) or isotropic fluid (col. 11 lines 66-67)], and a dichroic dye.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
